The Canyon News

Fiftieth Year | Canyon, Texas, Thursday, July 5, 1945 | Number 18

Wheat Harvest Is Virtually at End With Practically a Normal Yield

Only Small Acreage of Light Yielding Wheat Is Yet in Randall Fields

Harvest is practically over in Randall county, according to reports from elevators.

Due to the fact that ideal harvest weather has prevailed this year, the length of harvest has been greatly cut. Also the short wheat stalks made the handling of the wheat much more rapid than is the usual experience.

It is estimated that not more than 5% of the wheat acreage remains uncut. This is largely wheat which is on the border line of being unprofitable, but will yield enough to pay to handle if combines may be secured. Owners of such wheat are offering $2 per acre to cut this low yielding wheat, but so far there are few takers. It is estimated that about 50 combines per day are moving north up the highways, following the wheat belt. All wheat to the south of Randall county has been harvested.

Grain men state that the 1945 wheat yield for the Panhandle will be practically normal. For Randall county this means an average of about 8.2 bushels to the acre. Summer fallowed wheat has yielded from 20 to 30 bushels to the acre.

So far very few warehouse receipts have been issued. With elevators offering $1.45 per bushel for the wheat, most farmers prefer to sell their wheat as it is harvested. During the early days of harvest wheat was stored on the farms, but much of this will be hauled to market.

The railroads have done a good job in taking care of the car situation, in spite of government regulations. Shortage of railroad crews to spot the cars has been the greatest handicap this harvest. The Santa Fe has hired all of the 16 and 17 year old boys that could be found in order to assist in taking care of the harvest needs.

Many farmers are planting feed crops with the firm belief that good rains will fall in July. Unless a large acreage of feed is planted, the feed situation will be serious, according to observers.

Beef Subsidies Are Now Ready For Payments

Details of the producers beef subsidy program together with sight draft blanks are now in the county office.

Beef producers should file their applications with the county office in which their ranch, farm or feeding pens are located. This is not necessarily the county in which the owner resides.

Beef animals eligible are those weighing 800 pounds or more and sold for a price at or above the minimum set for the market where the cattle were sold. This minimum price at Amarillo and all of Randall county is $13.50; Ft. Worth $13.60; Oklahoma City $13.65; Los Angeles $14.95 and at Kansas City $13.85.

A producer to be eligible for the subsidy must have owned the cattle for at least 30 days before date of sale and must sell to a slaughterer for slaughter or present evidence to show that cattle was sold to a buyer who delivers the identical cattle to a slaughterer within 29 days from date of sale.

If a producer did not raise the cattle on which subsidy is claimed he must show the date of purchase, name and address of the person from whom purchased.

It is requested that any producer, who has sold cattle weighing above 800 pounds since May 19 and is in doubt as to eligibility for subsidy, present his sales evidence to the county office for checking in order to determine whether the subsidy is due.

All sales made from May 19 to June 30 are now payable and must be claimed before August 31. All other sales are payable for a period of 60 days from date of sale.

Payments are approved by the County AAA Committee and are made by a sight draft on Commodity Credit Corporation.

Lt. Brewster Is Given Honors Posthumously

A staff of officers from the Amarillo Army Air Field came down last week and presented to Mrs. Kate Donnell Brewster the bronze Air Medal, awarded posthumously to her husband, First Lt. Howard C Brewster for "superb performance and magnificent courage, skill, and devotion to duty in hazardous assignments." Since Mrs. Brewster had declined the acceptance in a public ceremony, the presentation was made in her home by Capt. Judd of the Public Relations Office.

Lieutenant Brewster was killed behind enemy lines on D-Day of last year. A letter from the Commander of the European Theater of Operations stated that he was buried with military honors at Blosville, France.

Randall County Man Is Named on Appeals Court

Randall county now has a representative on the Court of Civil Appeals, Seventh District, in Amarillo.

Judge William Q. Boyce took the oath of office Thursday to become a member of the court following appointment several months ago by Governor Coke Stevenson.

Judge Boyce was recently discharged from the armed forces. He went into the army under Selective Service from Randall county two years ago as a private. He was soon selected as a candidate for officer training, and was a Major when discharged.

Judge Boyce has lived in the south part of Amarillo for a number of years.

His father was a member of the Civil Appeals court many years ago.

Schools Receive More Money For the Coming Year

Schools in Texas will receive the largest school apportionment for 1945-46 in the history of the state. The rate was set Monday at Austin at $30 for each registered child for the coming year.

The State Board of Education hiked the apportionment for the present year from $25 to $27 per capita. This increase is made possible by the surplus in the school fund.

Randall county schools will be greatly benefited by this increase.

Reported Sgt. Jas. D. Loudder Will Be Given Furlough

It was reported by Associated Press Thursday that T-Sgt. James D. Loudder has completed 30 missions over Japan and would be given a furlough at home. He is one of five Texans who have received this furlough. He is a gunner on a B-29.

He is a son of Mrs. Minnie Loudder.

CEMETERY ASS'N MEETS

The Cemetery Association will meet in regular meeting Saturday afternoon at 4:00 o'clock in the Thompson Club room.

DISCHARGED FROM NAVY

Joe Carroll Dutton has received a medical discharge from the navy, and returned to the home of his parents, Mr. and Mrs. Early Dutton.

7th War Loan Drive Is On!

Scott Downing Is Reported as Missing, Pacific

Lt. Scott Downing, bombardier in the Air Corps, on B-29s, stationed in the Mariannas, has been missing in action over Japan since May 26, according to word received by his sister, Mrs. James H. Williams.

Lt. Downing has been in the service 2½ years. He crossed the International Date Line going west on Christmas Day. He had had two narrow escapes before this. In April he was forced to land on Iwo Jima for repairs before flying back to base. While there he met and visited with his brother, Jack, who is in the Navy and was stationed there.

His wife lives in California. Besides Mrs. Williams, he has two brothers, Bill and Neal who live in Canyon.

July Fourth Is Quiet Day Here

July fourth was a very quiet day in Canyon yesterday.

Practically all business was suspended for the day and citizens spent the day in various lines of recreation. For the most part, however, they stayed at home.

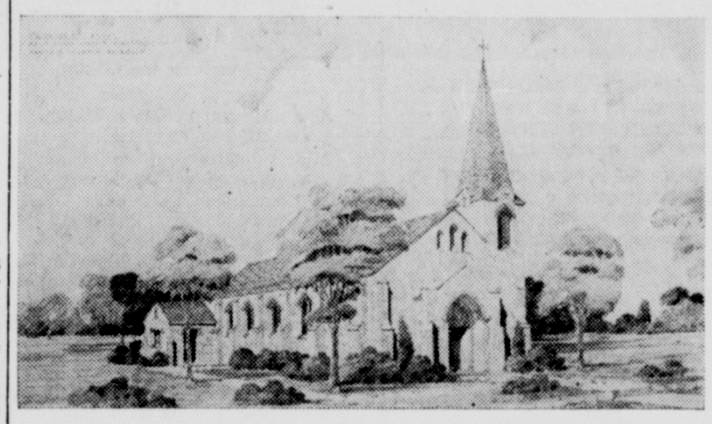
LT. LEON SMITH PROMOTED

Lt. (jg) Leon Smith has recently been promoted to that rank from Ensign, according to word received by his parents, Mr. and Mrs. O. A. Smith.

Lt. Smith is working in aerology somewhere in the Pacific.

Miss Beryl Hixson left last week to attend Texas State College for Women at Denton. Miss Hixson will take a special workshop course for home-making teacher. She is homemaking teacher at Sam Houston Junior High School in Amarillo.

Proposed Chapel for West Texas State Campus Is Shown in Picture Below



President J. A. Hill is giving his personal attention to the campaign to raise $50,000 for the erection of a new chapel building on the campus of West Texas State. The proposed building is pictured above.

The Campus Chapel will be placed on the site of the first home for the president, this building, which is no longer in use as a home, to be removed from the southeast corner of the campus where it has stood since the opening of the college.

This spot was chosen for the Chapel because it is easily accessible and yet affords quiet and privacy. It is also pointed out that it is a location already hallowed by many memories of significance in college history.

It is here that the first president, R. B. Cousins, and his family lived for eight years. It was here that Gregg Cousins, the president's youngest son, died, and from his death the Gregg Cousins Memorial Loan Fund came into existence, and has since helped hundreds of students. It was here that the faculty met to pray and plan after the original college building was destroyed by fire in March, 1914.

It was here, too, that hundreds of students, faculty members, parents and other friends of the college went to receive comfort or guidance, according to their needs. The place was "home" to dozens of students to whom college would have been impossible, but for the generosity of the presidents and their wives.

After the place was no longer used as a home for the president of the college, it became a hospital for aviation students, who found cheer as well as healing there. At present the Veteran's Guidance Center is housed in the building.

When the chapel becomes a reality, this spot on the campus will continue to give people precious memories of time spent at the college.

Bond Sales To End on Friday

Reports on All Sales Must Be in Dallas by Saturday for Credit

The 7th War Loan Drive will come to a close Saturday, July 7.

Randall county has passed its quota and is nearing the point of double the amount requested by the government.

County Chairman R. H. Wright has expressed great satisfaction in the manner in which citizens of Randall county have responded to the bond drive, and urges that those who have not bought E bonds during this drive should do so before Friday night. Remittances for all bonds to be counted on the 7th War Loan Drive must be in Dallas Saturday, and must therefore be sent from Canyon by Friday night.

Happy Birthday

July 6th—
Eldon Garrison
John A. Conatser
T. M. Moore
Mrs. O. D. McLellan, Jr.

July 7th—
Mrs. Frank Hicks
Kenneth Black
W. N. Higgins
Jerry Downing
Mrs. Forrest Hollabaugh
John H. Wright
Mrs. J. E. Keenan
O. I. Smith
Gordon Lyons
Rose Marie Ackfeld

July 8th—
Ira Prichard
David Eugene Miller
Laverne Hinders
Buron Fewell
Marvin Winters
Earl Henderson
E. N. Zachry
Mrs. Mary Simon

July 9th—
Chloe Ann Black
Wilma A. Dugan
Elise Bauer
Mrs. Glen Costley
Mrs. R. N. Lindsey

July 10th—
Clarence Eugene Thompson
Donald Olson
G. H. Leseberg
Jackie Dee Burrus
Mrs. E. J. Sanders
Thomas Douglas Marshall

July 11th—
Mrs. R. E. Gatton, Jr.
Mrs. T. C. Thompson
Ruth Sherer
Lovella Pitt
Mary Ann Sloan
Henry F. Miller
Rae June Cabe
Mrs. T. W. Ziegler
Joe Douglas Russell
Lynn W. Neill
Mrs. H. P. Neill

July 12th—
Mrs. B. F. Machen
Mrs. W. T. Davis

STORK SPECIAL

Born to Mr. and Mrs. Claude Wallen, twin boys, Sunday, July 1. The boys weighed 5½ and 5¼ pounds.

Mrs. Emmett Burford and Bill Gene of Lubbock visited with her sister, Mrs. Cecil Simms and family last week.

Mrs. Sanford Black Died at Home Wednesday

Mrs. Sanford Black died unexpectedly Wednesday morning.

She was at work at Allen and Black's on Tuesday. As we go to press no details can be learned.

Mrs. Black was the daughter of Mrs. Jessie Reid and has been a Canyon citizen all her life. She is survived by her husband; two sons, Lt. Sanford Black, Jr. in the Army some where in Europe, and George Black, U. S. N. in Hawaii; one daughter, Evelyn; her mother and several sisters.

Miss Carlee Wirt underwent a tonsillectomy Saturday. She is spending this week with relatives in Canyon.

Bobby Goodwin of Trinidad, Colo., is visiting this week with his grandparents, Mr. and Mrs. C. P. Shelnutt.

$50,000 Needed to Erect Chapel

President Takes Charge of Campaign To Raise Funds For New Chapel Building

The drive to complete raising a minimum of $50,000 for the building of a campus chapel is under way this week. The project has received the enthusiastic endorsement of the West Texas State College Foundation, and President J. A. Hill has announced that he will spend much of his time during the next few weeks in carrying the undertaking to a quick completion.

The College Chapel will be built of Texas stone, described by Architect M. O. Carder as "rough, random Ashler stone," which, he explained, is much like that of which the Museum is built.

The style of the building is that which was frequently used in early English chapels, and is a modified Gothic.

The interior will be finished in rough-sawed, stained wood and textured plaster walls will provide good acoustics and restful beauty.

Within the chapel will be a sanctuary, which will seat 150 people; adjoining it will be a conference room which, among other things, will provide a suitable meeting place for the Student Christian Association and other small groups meeting for study and worship; there will be a chancel, planned so that it can be used by any denomination, and so that it will be adapted to weddings; in the rear of the chapel, the balcony will provide space for the organ and the choir.

It is hoped that the drive for funds, and the building of the chapel can both be finished under twelve months. The architect points out that the speed with which building can go forward will depend upon the supply of material and labor which is immediately available.

Instruments Are Needed by Red Cross For Army

Is there an old musical instrument of any kind or sort lying around your house?

The Red Cross is making a plea for instruments to be used in the convalescent ward at the Army Hospital at the Amarillo Army Air Field. These men are returned from over seas battles and are in need of instruments, French harps, trumpets, or what have you. If you have an instrument that you would like to donate, call Mrs. Bessie Melton.

Miss Margaret Rusk from Torrence, Calif., spent the week end with her mother, Mrs. Jessie Rusk.

Speer Is Assisting to Prepare Book on Public Safety in the University

There's no use telling Texas daughters not to go near the water these days if there's a cooling stream nearby. So the perils that cost so many child lives on picnics and outings will guide preparation of an important section in the safety handbook for public school teachers this summer at the University of Texas. Here, Capt. J. O. Musick of the Highway Patrol and J. B. Speer, School Superintendent at Canyon and a member of the panel which will write the book, check notes with State Supt. L. A. Woods (right) as they follow the activities of youngsters on an outing for actual material to be used in the book. Miss Nona Goddard, Austin, watches over Jerry Lyles, 7, and Linda Beth Jordan, 8, both of Dallas, and Honey Story, 5, Austin, as they play dangerously close to deep water. The investigation and preparation of the book is partly financed by the Texas Safety Association and is being carried on under the direction of the Safety Education Division in the State Department of Education and the University of Texas.

Capt. Joe Gill Is Decorated For Distinguished Service in Germany

Captain Joe Gill of Canyon is shown above receiving the Distinguished Service Cross from General Dahlquist for bravery in leading his men against the Germans. He personally killed one German officer and captured 25 enemy in leading the assault against four pill boxes.

More Men in the Service Visiting at Homes Here

Murphy White, of the Army Air Corps, son of Mr. and Mrs. J. M. White is spending a delay enroute furlough with his parents. He is being transferred from Mississippi to Illinois.

Pfc. Oleff Hamblen returned to Kingman, Arizona, Tuesday night after having spent a two weeks furlough with his parents, Mr. and Mrs. W. H. Hamblen of the Wayside community.

Deep apologies to the members of both the 5th and 15th Air Corps. S-Sgt. James T. Harp, Lt. Bob Ziegler and Lt. Hud Prichard, Jr., all at home on furloughs, are with the 15th Air Corps, not the 5th as was stated in the News last week.

Pvt. Paul Hicks of the United States Marines is visiting in Canyon after 18 months in the Pacific. He returned to the states from Iwo Jima, suffering from battle fatigue. He will report to a hospital in Tennessee for a check up at the end of his furlough to determine whether he will be kept in the service or discharged.

Charles Thornton S 2-c, arrived Thursday night at the home of his uncle and aunt, Mr. and Mrs. Ross Cope. Seaman Thornton had been serving the last nine months on the destroyer U. S. Bright.

The Bright was damaged recently by a suicide plane and put into the west coast for repairs.

Mrs. Thornton has been making her home with her father, C. A. Roberts, near Happy.

Last summer when Mr. Cope was in California he worked in the shipyards and helped to build the Bright.

Business Changes Are Being Made on 5th Avenue

Fifth Avenue is changing. Beginning with the Hill Implement Company, which has been enlarged to double its floor space, has a new plate glass front, new office and parts fixtures.

Canyon Implement and Supply Company, 1506 Fifth is getting a new coat of paint, new shelving and office arrangement ready for opening for business somewhere near the first of August. John Deere machinery will be handled there.

In the next block west at 1408, two soldiers from Amarillo Field are setting up a Body and Fender Works in the old Blacksmith Shop. These men, Bob Edwards, who owned a shop of this kind for two years in Seattle, Washington before entering the army, and Babe Hyatt of Los Angeles, California, are working there during their off time in cleaning flooring, building new doors and otherwise putting the building into shape for their machinery and tools which are in transit.

Two Boys Caught and Charged With Theft of Motor

Birch Campbell, deputy sheriff, assisted officers from Tulia in rounding up two boys who were charged with stealing a motor from an irrigation well at Dimmitt.

The boys had brought the motor to Canyon and were installing it in a car. In about two more hours the boys would have completed their work and hit the highway.

FULCHER FINISHES BOOT

Bobby Joe Fulcher, Seaman second class, USNR, of Canyon, recently reported at the Naval Training and Distribution Center, Shoemaker, Calif., for reclassification and further assignment.

Seaman Fulcher, 18, is the son of Mrs. J. P. Fulcher, Palo Duro State Park, Route 2, Canyon. He received his "boot" training at the Naval Training Center, San Diego, Calif.

Ed Irlbeck Is Badly Burned

Gasoline Thrown Over Man Friday As He Worked in Starting Car—Reported Fair

Friday at noon Ed Irlbeck was badly burned on the chest, neck, arms and face when a car he was priming backfired throwing burning gasoline over him.

Mr. Irlbeck had parked the family car just north of the City Hall while he attended to business in town. When he with his family started home, the car would not start. After he had primed the car, he asked his wife to step on the starter before he had put all the caps back on. The car backfired, throwing the gas on him.

Mr. Irlbeck, a living torch ran across the street. Edd Weeks ran from the barber shop, caught Mr. Irlbeck and threw him down. Mr. Irlbeck fought Mr. Weeks off and tried to run again, but Mr. Weeks threw him the second time and with the help of others, who had rushed to the rescue, extinguished the flames. Bud Myers rushed Mr. Irlbeck to Dr. Jarrett's office, where he was given first aid. Griggs-Warren ambulance then carried him to St. Anthony's Hospital where he was doing fairly well at the last report.

Mr. Weeks burned his hands painfully but was able to be back at work Monday.

1945 Rainfall Is Making Low All-Time Record

Rainfall for the first six months of 1945 comes near setting an all time low. The record for 1945 is only 5.64 inches for this period of six months, which is distributed as follows:

January	.85
February	.30
March	.42
April	2.36
May	.42
June	1.29

Moisture was registered on 23 days during the six months. However, weather experts state that moisture of less than a quarter inch is of no benefits to crops. If this is true, then only eight of these rains were of any benefit to the wheat crop of 1945.

Rain in Canyon Saturday afternoon amounted to .39 of an inch This rain had the good effect of dropping the temperature for the entire Southwest, following the highest temperature for the summer last week. The high point was 102 degrees on Wednesday afternoon. Cool weather has prevailed since the rain.

Rationing Calendar

July 1 to August 1

Sugar: Stamp No. 36 is good for 5 lbs. sugar through August 31.

Meats and Fats: Book IV, red Stamps K2 through Z2 are good for 10 points each. A1 through E 1 become valid July 1. K2 through P2 expire July 31.

Processed Foods: Book IV, blue stamps T2 through H1 are good for 10 points each. J1 through N1 become valid July 1. T2 through X2 expire July 31.

Shoes: Book III, stamps one, two and three, with airplane pictures, each good for one pair shoes indefinitely. A new stamp will be validated August 1.

Gasoline: A coupons, 6 gallons each with No. 16 expiring Sept. 21. B6, B7, B8, C6, C7 and C8 rations have a value of 5 gallons each. R2 and R3, 5 gallons. (Valid for bulk delivery only); T coupons designated "Second Quarter" good for 5 gallons through June 30; D, one and one half gal.; and E2 and 33 one gallon each.

Fat Salvage: Every pound of waste kitchen fat is worth two red points and 4 cents.

Editorials

Senators Connally and Vandenberg have made clear cases to the Senate of the United Nations Charter. Both made it very clear that this Charter was not infallible. No one knows how it will work. But it is a step in the right direction. Unless the first step toward unity is taken, and backed by peace-loving nations, there is no hope for permanent peace. Both Senators can see no sense for the Senate wasting valuable time in useless discussions of the Charter. Some of the isolationist Senators may try to write amendments into the Charter. That will be hopeless. With unity of both Democrats and Republicans in their demand for world peace, those who might oppose are in the small minority. Even Senator Wheeler, who fought all preparations for war, has indicated that he will offer no opposition, and will probably vote for the Charter. America as well as all other civilized nations wants peace. We will not sit down on the job this time. We tried this very thing in 1918-19, and another war hit us before we knew what was going on.

We are quite sure that no American wants to see Elliott (General) Roosevelt punished just because he is the derelict son of a distinguished father. But there prevails the impression that he would never have reached his position in the army without White House influence. His present financial troubles are just stones along the pathway. He may have tried to follow the straight and narrow path, but his footsteps hit the trail only on infrequent occasions. The army is supposed to carefully check the candidate's reputation before granting a captain's commission to an untrained civilian; and to more carefully check before he is given promotions. Hidden away some place was the $200,000 loan, which has been settled for $4,000. The internal revenue department promises full investigation. The general has hired a distinguished lawyer to protect him. This time he will not find a haven in the White House.

We shudder at the terrible loss of this war. More than a million fine American boys have already lost their lives, or have suffered wounds. This is to say nothing of the other millions who will return home never to be the same again, physically or mentally. War does not pay, either the victor or the vanquished. In addition to the loss of life, just imagine the pleasure and profit of which future generations will be deprived because of the wastefulness of war. In gasoline alone, America wasted 3 billion gallons of gasoline. The waste of gas is only the beginning of the cost in useful materials which have been sacrificed. Future generations will be deprived of many pleasures because of the ambitions of Hitler and his gang of cutthroats. The lesson is certainly clear to all of us: We must do our part to see that wars shall not occur again.

If you will recall, The News repeatedly questioned the glowing statements made by our air forces of the destruction which they were causing in Germany. We wondered how they figured the amount of damage when they made their estimates from 5 miles up in the sky. This is no reflection on our wonderful airmen, but on the policy of war information in giving the public glowing reports. It is now revealed that German war factories were hardly touched in the bombing, in spite of the repeated claims of great success. The same claims have been made again and again of the effectiveness of our raids on Japan. All of us hope that the results are as good as the news reports indicate.

Edward Stettinus may be "kicked upstairs," but the prediction of his release has been made since the day President Truman took office. The change of Secretary of State is in line with the President's desire to place his own advisers in the cabinet, rather than to continue using men whom he inherited. Regardless of the success of Stettinus, the nation will feel more secure after the Wall Street millionaire club of the state's department is broken up. In view of the fact that the President admits that the foreign policy for the nation is much more obscure to him than the domestic problem, he wants to place responsibility in hands that he can trust. Stettinus probably handled the Peace Conference very well, but there has always been the suspicion that his actions were rather guided by his connection with Morgan and the other big Wall Street boys, who are connected up with London. This is no criticism of the wealth of the man. Even the poorest man in the nation would like to exchange places with the wealthiest Wall Street operator. But the nation prefers to see our foreign problems in other hands than those whom are known to have profited so greatly from our wars.

The Newsman has rather boasted of the fact that he will be in Canyon for 35 years the last of this month. Running one business for that length of time has its advantages and its disadvantages. We have heard it rumored that some times churches are run for the benefit of the preachers, rather than the salvation of the members; likewise, we hear school teachers criticized for being on the same job too long. Yet business men are prone to boast of the fact that a community will let them stay such a long time. A former Canyon citizen recently jarred our back teeth by telling us that we had been in Canyon too long—maybe he is right. Maybe we ought to change our preachers and our teachers more often. Since the whole nation is on wheels—or was before the war—maybe it would be a good thing for all of us to change scenery more often. What do you say?

District judges of Texas will not get their $1,000 per year increase in salary. The Governor vetoed the bill. This was the only veto of a major appropriation bill. The Governor called attention to the need of reducing a number of district courts in the state. The legislature eliminated only one, and then sought to increase salaries of the judges from $5,000 to $6,000. Stevenson stated that this was a greater increase than was allowed any other state employee. The public is aware of the fact that some judges are underpaid. But they are likewise fully aware of the fact that many of them are grossly overpaid. It is a hard situation when the just are punished because of the unjust. This condition exists all the way through life.

Congress has spanked the autocrats of OPA to a considerable degree in giving Secretary of Agriculture Clinton P. Anderson virtual control of the food situation. The trouble with little men in big places is their determination to use authority in a vain effort to make themselves look big and important. Overlapping authority of bureaus in Washington has brought about most of this confusion. Since President Truman is fresh from the halls of Congress where he has studied all these problems, it is hoped that he will be able to cut a lot of the red tape which has so greatly hampered the war. OPA has done a good job, in spite of the foolish regulations which some of the brass hats have put over.

Are the Germans doing a good job of softening America? Pages of stuff have come out of Germany as to the feelings of Hitler as he saw the Germans facing defeat. If he was so dismayed at defeat, just why did he hold on until the last and be personally responsible for the destruction of the major German cities? All this dope sounds like pure propaganda—of the stinking kind.

Governor Stevenson has vetoed a bill which sought to advance the filing date for Texas candidates. He is not opposed to the idea, but the legislature failed to include all of the state candidates. The same confusion would have continued as now exists. No use passing a law which only adds confusion to the public interest in public affairs. The Governor might have added that the entire Terrell Election Law is in a mess, and the legislature should have taken time to overhaul it. He repeatedly called attention to the constitutional provision that the state MUST be redistricted after every federal census. The legislature has refused to do this simply because some of the members would be out of jobs if a fair redistricting bill was passed.

Will the President let Henry Wallace out of the cabinet? We have been asked this a number of times. Our personal reaction is that Truman is too good a politician to fire Henry. Wallace represents the only faction that might cause Truman any political difficulty in 1948. The President will prefer to keep Wallace buried in the cabinet than to have him on the loose to work up political opposition. July will probably be the fateful month for the President as the Senate considers the Peace Charter and he faces Churchill and Stalin. The results of these two major tests will do a lot in forming the future for Truman.

Austin is still wondering what Calculation Coke is going to do in 1946. A lot of politicians are fearful that he will run for Governor for a third term. Coke has busted wide open many precedents in Texas. We are not too sure that he will not be a candidate for re-election. This would greatly dismay a lot of ambitious candidates.

President Truman is not letting friendship stand in the way of a good administration. He has fired some of his "inside" friends, who failed to produce. This is just what the American people expect.

The Japs are dumb. They still are sending over balloons hoping to kill a few innocent Americans or burn down a few houses. So far the cost has far exceeded the results.

OUR DEMOCRACY——by Mat
BRIDGE-BUILDERS
AMERICA'S TRADITIONAL ENGINEERING INGENUITY AND INTEGRITY OF WORKMANSHIP ARE SHOWN IN THE ACCOMPLISHMENTS OF HER BRIDGE-BUILDERS. A FEW EARLY BRIDGES STILL STAND—REMINDERS OF HOW WELL OUR FOREFATHERS BUILT.
ENGINEERING GENIUS HAS FLOURISHED IN OUR DEMOCRACY—MEETING CONSTANTLY GREATER DEMANDS—ACHIEVING THE IMPOSSIBLE.
FOR EXAMPLE—THE TOWERING SPANS OF THE GOLDEN GATE BRIDGE STRETCH 4200 FEET ACROSS SAN FRANCISCO BAY.
NOW, IN WAR, AMERICAN ENGINEERS WORK UNDER FIRE, IN STRANGE TERRAIN, WITH INCREDIBLE SPEED—BUILDING BRIDGES OVER WHICH AMERICA IS MARCHING TO VICTORY.

1942 Cars Taken Off Ration List

Used 1942 automobiles were removed from rationing on July 2.

Principal reason for the rationing of used 1942 cars—that they were generally the best automobiles available aside from new 1942 cars and so should be restricted to essential useds—no longer holds true, making rationing unnecessary.

Automobile dealers and car rental agencies must continue to maintain records previously required for all 1942 cars, but all rationing restrictions on the transfer, acquisition, registration, alteration and use of 1942 cars are being removed.

You can't expect $1 an hour for your working time if you spend your leisure hours like they were worth a dime a dozen.

"The Flag" by Joe Colton

It's the sun of California
And the rugged coast of Maine,
It's the pines of Carolina
And the covered wagon train,
It's a bugle call at Yorktown
And a clipper in the bay,
It's a rustic bridge at Concord
And a soldier lad away,
It's a country's shining glory—
It's red, white and heaven's blue,
It's an emblem and a beacon,
It's the banner of the true.

It's the prairie and the forest
And the hunter's lonely camp,
It's a homestead on a hilltop,
And a housewife's evening lamp,
It's the joy of good companions
And a pleasant evening's end,
It's the happiness of children
And the handclasp of a friend,
It's the magic of the mountains
And the rivers and the sea,
It's tolerance and courage,
It's a people brave and free.

It's the kindly deeds of neighbors,
It's forgetting race and creed,
It's the good works done together,
It's a hand for one in need,
It's a lookout's lonely virgil
And a worker at his trade,
It's a heaven for the outcast,
It's a stout heart undismayed,
It's the sunlight and the starlight,
It's the rainbow in the skies,
It's humanity triumphant,
It's the grandest flag that flies!

'Tis said that more women should be in politics, because their minds are cleaner. Maybe so, but they ought to be, they change them more often.

Placing flowers on the graves of the dead originated with the ancients, who believed the deceased enjoyed the fragrance of the flowers.

Isn't it peculiar that no matter how busy we are we always see to it that our auto is kept in good repair?

No wonder Captain Syyed Shaykh Achmed Abdullah Khan el-Iddrissyieh el Duran wrote under the pen name of Achmed Abdullah.

7th War Loan Drive Is On!

The idea of using a cross in place of a signature dates back to early medieval times.

The modern girl does not pursue a man; nor a mousetrap a mouse.

Notes From County H. D. Agent

Velva Fruit, the smooth-as-velvet frozen dessert which made its debut last summer, has been perfected for home as well as commercial freezing by food research specialists of the U. S. Department of Agriculture.

Berries, cantaloupe, peaches—almost any kind of fresh, fragrant, fully-ripe and flavorful fruit—may be used for Velva Fruit. Mellow-ripe fruit too soft for canning is ideal, because it has full flavor and color. One serving of Velva Fruit requires about 1 tablespoon sugar.

Here's the general method for making Velva Fruit at home: Mash the washed, pitted, peeled fruit. Press through a sieve or fine colander to make a puree. Because air darkens apricots and peaches, quarter and put them in boiling syrup (8 parts water to 1 part sugar) 3 minutes before sieving.

To make approximately 2 quarts of Velva Fruit: Mix 3 cups puree, ¾ to 1 cup sugar—depending on sweetness of fruit, and ⅛ teaspoon salt. For less acid fruits like peaches, add 1 tablespoon lemon juice. Keep puree cool.

Soak 1 tablespoon gelatin 5 minutes in ¼ cup cold water to soften, then dissolve by heating over boiling water 10 minutes. Add puree slowly to the hot gelatin, stirring continuously.

Pour into ice cream freezer. Using a mixture of 6 parts ice to 1 part salt, freeze 20 minutes, or until crank turns hard. Remove dasher. Velva Fruit may be served soft frozen, or after hardening several hours.

To make Velva Fruit in the refrigerator, freeze mixture in trays until firm. Turn into a chilled bowl and whip smooth with a wooden spoon or electric mixer. Return to refrigerator for hardening. Work quickly so mixture does not completely melt. Refrigerator-frozen Velva Fruit is less light and velvety than freezer-made. Either puree or finished dessert may be frozen and stored for several months.

This'll Slow Him Down

Study Vitalized By Museum Tour

Pioneer experiences were made more real to Miss Wilma Hixson's Demonstration High School class in American history when a carefully planned visit was made to the Museum.

Mr. Boone McClure, assistant curator of the Museum, conducted the thirty pupils, showing and explaining those things which would add to their appreciation of the westward movement. Joyce Miller is the practice teacher who helped in the preparation for the visit.

When transportation is available, thousands of pupils visit the Museum each year.

The largest inland cotton compress in the world is located in Greenville, Texas.

The peak for chees production in Texas was 1941, when more than 21,000,000 pounds were produced.

Plan Postwar Help for Vision

'Color Conditioning' Seen As Aid to Health and Employe Efficiency.

NEW YORK. — A postwar program for scientifically "color conditioning" industrial interiors was announced by Du Pont, following extensive study of employing functional color to improve employe efficiency, health, comfort and morale.

Described as the science of determining the correct industrial color environment for maximum vision, the system has been developed in collaboration with Faber Birren, industrial color authority. Among the benefits of "color conditioning" are listed increased production, improved quality of workmanship, and reduced personal injuries, as reported in the Chicago Tribune.

The "color conditioning" technique is designed to protect employes against eyestrain by reducing glare and eliminating extreme contrasts between light and dark. It recommends restraint in using color, especially distracting, overstimulating hues, as well as abolishing light-robbing dark areas.

Seek Correct Colors.

Research findings have determined correct colors for factory walls, for machines, and for backgrounds within the field of vision. Surveys of entire plants where an integrated color system has been in effect from front to rear door demonstrate that uniform wall, dado and equipment painting, with a "change of pace" for corridors, stair wells and washrooms, yields beneficial results as revealed in comparative safety, production, and absentee records. Only a few colors in combinations need be utilized, the studies show.

The announcement emphasized that the program, although designed to introduce more color into the industrial scene, is not mere "interior decoration" of plants but the outcome of long term research that already has done much toward "putting color to work" for industrial efficiency. Hundreds of case histories based on color installations in all types of plants were compiled and studied.

New colors have been developed for industrial interiors. These are not decorator's colors in the bright, clear range but hues subdued in tone and unobtrusive and practical. In selecting the colors, illuminating and color engineers studied light reflectance qualities, hue characteristics, influence of different kinds of illumination and psychological characteristics.

Large Plants Studied.

Applications of "color conditioning" were made in many of America's large industrial plants. These case histories were studied in determining the functionally correct colors for industrial use. Under present conditions when raw materials for paint are critically short, the color conditioning colors are available in limited quantities only, it was stated.

Color conditioning began in hospitals where scientific studies of color were made to aid the visual acuity of the surgeon. Similar investigations later were performed in schools and factories.

Yank Police at Leipzig Pack Terrific Wallop

LEIPZIG, GERMANY. — The Allied military government in Leipzig is supported by a police force that packs a terrific punch. The force is equipped with half-tracks with revolving turrets, machine guns and self-propelled guns.

Trouble has occurred at food stores and at liquor and tobacco shops. Liberated foreign workers stormed them and the Germans got the same idea. The American half-tracks fired shots into the air and the mobs were charged with other vehicles. This scattered the rioters.

Curfew violators were numerous the first night. They were herded into a large vacant lot and forced to spend the night there.

U. S. Glider Pilot Proves He Can Land 'On a Dime'

MUSKEGON, MICH. — Uncle Sam's pilots can literally land gliders "on a dime"—one of them proved it here.

Lt. John S. Bryant of Lexington, Ky., a pilot in the Troop Carrier Command, accepted a challenge to free his glider from a transport plane at 2,000 feet and bring it to a halt with the nose resting on a dime. The coin was placed on a white sheet to increase its visibility.

When Bryant made good, officers of the Troop Carrier Command, here with a group of invasion veterans to stir interest in glider production, said they believed it the first time such a feat had been accomplished.

Ersatz Stockings Become Blankets for Prisoners

WASHINGTON. — Captured "ersatz stockings" worn by German soldiers last winter as protection against cold, have been turned into blankets for German prisoners by the quartermaster corps. The rectangular pieces of cotton and wool cloth fell into American hands with captured enemy supplies. Measuring 18 by 24 inches each, 8 of the cloths sewn together make a warm blanket.

We were fortunate that Hitler was caught with his bridges up.

Chapel Fund Gifts Non-Taxable

Gifts to the West Texas Chapel Fund may have a bearing on the tax payment of the giver.

It has been pointed out that Section 23(o) of the Internal Revenue Code allows a tax payer 15% deductions on adjusted gross income for contributions made to charitable or educational purposes.

This gives a tax payer, who is in the larger income brackets, an opportunity to give freely to educational institutions and yet have as much left for his own use as if he had not made the contribution.

Gifts, except for very large amounts, are not subject to the gift tax, provided they are made before the death of the giver. The same property, however, may become subject to the estate tax if the gift is not transferred until after the death of the donor.

Because of this provision in the estate tax law, many wealthy people have begun a systematic program of gift giving each year. This costs the donor no more in the long run and is a tax-saving in so far as the individual locality or community is concerned.

Gifts to the West Texas State College Chapel Fund are to be addressed to that fund ih care of the Office of the President, Canyon, Texas.

Susan's bath is the last of four
The water's hot . . . and there's gallons more!

AH!... WHAT FUN it will be to live in a house where even the faucets are touched with magic! Where a faithful *automatic* Gas water-heating system keeps all the hot water you need constantly on tap!

Ample Hot Water Is Essential Need In Modern Homes

Modern living standards in America demand a supply of hot water at uniformly correct temperatures between 130 and 140 degrees Fahrenheit available at any time of the day or night. At these temperatures, hot water provides the greatest usefulness for the upkeep of the home and the health and physical well-being as well as comfort of the family.

An automatic gas water heater provides the practical means for this standard of hot water service, and is the most popular equipment for the purpose because of its reliability and economy.

The economy of a gas water heater results from an easily controlled and dependable automatic device which turns on the gas as required by the household needs for hot water, thus using precisely the amount of fuel necessary, no more, no less.

Social Events of the Week Clubs and Organizations

MRS. LEE FOSTER HONORS MRS. LUCY MINTURN FRIDAY

Friday afternoon Mrs. Lee Foster honored Mrs. Lucy Minturn, sister of Miss Pauline Brigham with bridge.

Bowls and vases of summer garden flowers were attractively arranged in the entertainment rooms.

Those playing were: Mrs. Minturn, Miss Brigham, Mrs. A. K. Knott, Mrs. C. R. Burrow, Mrs. R. A. Neblett, Mrs. W. A. Warren, Mrs. D. A. Shirley, Mrs. J. M. White, Mrs. R. P. Jarrett, Mrs. S. B. Loudder, Mrs. S. L. Ingham and the hostess.

Mrs. R. P. Jarrett won the high score prize.. A guest prize was presented to Mrs. Minturn.

At the social hour a salad plate with an iced drink was served to the guests.

Lewis Reed, 1st Class Petty Officer, U. S. N. from Little Rock, Ark., visited last week in the home of Mr. and Mrs. A. D. Prater.

Mrs. George Barnard from Castle Rock, Colo., is visiting her daughter, Mrs. S. F. Shenefelt.

RITA JO CROW, ALICE MAY SIMMS HAVE THEATRE PARTY

Saturday, June 30, Rita Jo Crow and Alice May Simms entertained a group of friends with a theater party.

After the show Mrs. W. R. Crow and Mrs. Cecil Simms served birthday refreshments in Rita Jo's home to honor further the joint birthdays of their daughters.

Guests for the afternoon were Bill Gene Burford from Lubbock, David Miller, Jo Dickerson, Juannel Burrus, Jo David Black, Al Rushing, Ed Childers, Ray June Ford, Debra McDonald, Helen and Annette Myers, Johnnette Weeks, Windene Nicklaus, Phyllis Wall, Dora Jean McAtee, Betty Ruth Glanton, Edel and Eloyce Money, Jack McCormick, Dorothy McReynolds, Glora Faye and Bobby Wagner, Laura Kinnery, Avalon Brown and Kenneth Kirkland.

Mrs. Jeff Wallace has as guests in her home her mother, Mrs. J. W. Matthews of Iowa Park, Texas, and her niece, Miss Carolyn Sue Gay of Nacona, Texas.

PARK H. D. CLUB MEETS WITH MRS. CHAS. WINEINGER

Making useful articles from old things was the roll call for the Park Home Demonstration Club which met with Mrs. Charles Wineinger on Thursday, June 21.

Among the articles mentioned were children's purses, house shoes, and belts made from discarded felt hats; curtains and pillow cases from old sheets; a child's dress from a lady's dress; rugs, from silk hose or rags; a dressing stool made from a small nail keg.

Apple pie a la mode and punch were served to the eight club members and to Mrs. Wineinger and Mrs. R. C. Gunnton of Albuquerque, N. M.

Elwood Park in Amarillo was selected for the meeting to be held on July 7. Miss Lou Ella Patterson will present a lecture on time saving devices and methods for the home maker. Watermelon will be served by the club as refreshments at this meeting.

PUBLIC SERVICE EMPLOYEES HAVE CHICKEN SUPPER PICNIC

Monday night of last week the employees of the Southwestern Public Service Company enjoyed a picnic at the Country Club grounds.

At the supper hour fried chicken with all the picnic trimmings was served to Mr. and Mrs. R. B. Holland and Gwendolyn, Mr. and Mrs. K. E. Frieze, Mrs. Ed Pelley and Edward, Mr. and Mrs. Max Barnard, Mrs. John Haines, Virgie Ruth, Valeta and Joanna; Mr. and Mrs. W. M. Thompson, Billy and Buddy; Mrs. Maxine Black, Larry and Jo David; Mr. and Mrs. Henry Grindstaff and baby; and Charles Ray Kelso.

MRS. W. A. WARREN HOSTESS TO 1925 BRIDGE CLUB

Wednesday afternoon, June 20, Mrs. W. A. Warren was hostess to the 1925 Bridge Club and guests.

Garden flowers in profusion decorated the entertainment rooms.

At the refreshment hour a salad plate was served to Mrs. J. D. Barker, Mrs. Cecil Briggs, Mrs. Herschel Coffee, Mrs. Madison Daugherty, Mrs. Hud Prichard, Mrs. Ray McReynolds, Mrs. J. M. White, Mrs. J. J. Walker, Mrs. Geo. Nance, Mrs. Ray Campbell, Mrs. Gus Miller, Mrs. Lee Foster, Mrs. C. R. Burrow, Mrs. W. C. Black, Mrs. Robert P. Jarrett, Mrs. D. A. Shirley, Mrs. W. W. Nicklaus, Mrs. Clyde W. Warwick, Mrs. S. B. Loudder, Mrs. Bryan McDonald.

Mr. and Mrs. A. G. Brant and Carol Ann Holt spent the week end in Hobbs, N. Mex., were Mr. and Mr. Brant attended to business and they visited with Mrs. Brant's sister, Mrs. George T. Waldron. Opal Joyce Brant, who had been visiting there, returned home with her parents. Enroute home they stopped in Morton, Texas to visit with Mr. and Mrs. Charlie Cravy, brother of Mrs. Brant.

Lt. (jg) and Mrs. Lee Russell from Norman, Okla., are spending a part of a delay enroute leave with Mrs. Russell's mother, Mrs. Charles Flesher. Mrs. Flesher accompanied them to Colorado for a few days. Lt. Russell will report to Florida for further assignment at the end of his furlough.

Pvt. Malcolm D. Cashwell arrived Friday from Long Beach, Calif., to visit in the Joe Cox home. Monday morning he and Mrs. Cashwell, the former Helen Joe Cox, left to visit with his parents, Mr. and Mrs. M. D. Cashwell at Federville, N. C. for a few days.

Bill and Dick Morgan of San Fernando, Calif., are spending the summer with their great-uncle and great-aunt, Mr. and Mrs. J. J. Walker. The boys' mother will be remembered as Miss Joan Estes.

Jerry McAtee, grandson of Mr. and Mrs. W. H. McAtee, has gone to McLean to visit for several weeks with his step-mother, Mrs. Don McAtee.

Miss Hazel and Mary Lee Cooper who teach school in California, arrived Friday night to spend the summer vacation in the parental C. O. Cooper home.

Mr. and Mrs. R. E. Studor of McKeever, N. Y. are visiting indefinitely with their son-in-law and daughter, Lt. and Mrs. Don Metzger, 911B Fifth Ave. Lt. Metzger is stationed at Amarillo Field.

Mrs. John Hunter, her mother, Mrs. Smith, and her father-in-law, W. A. Hunter, accompanied Mr. and Mrs. B. B. Cluck to Glen Rose for two weeks treatment.

Wake up your family's appetite for breakfast by serving these cheerful good morning foods. What a break for breakfast they are—good-tasting and good-for-you, these fine foods change morning grouches into sunny smiles. WOMEN '38 to 52' are you embarrassed by HOT FLASHES?

If you suffer from hot flashes, feel weak, nervous, highstrung, a bit blue at times—due to the functional "middle-age" period peculiar to women—try this great medicine—Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Pinkham's Compound HELPS NATURE. It's one of the best known medicines for this purpose. Follow label directions.

Jap Workmanship Is Found Mediocre

Wasteful Use of Material Reported by Experts.

WASHINGTON. — The Battelle Memorial Institute of Industrial and Scientific Research reported that metallurgical examination of captured enemy war materiel shows that Japanese workmanship is "consistently mediocre" while German craftsmanship "is just as consistently good."

The report, covering studies for the army ordnance and United States navy departments, described the Japs as being "copycats" in their workmanship but said "unpressed by the need for metal conservation, they can afford to lag in design and to accept inferior standards in the production of their war materiel."

The studies have shown the Japs are using an abundance of vital alloying metals, indicating they had adequate sources or stockpiles at the time the products were made, the report said.

"German war material, on the other hand, shows definite shortages of some metals," it added, "and many of the new materials, processes, and designs which the Germans originate are answers to the shortages in critical materials."

The research experts reported it is generally considered the Germans are short of copper nickel, molybdenum, vanadium, tungsten, chromium and manganese.

"Significant in Jap war material," the report said, "is the wasteful use of steels made from scrap carrying a high level of residual metals. This indicates either indifference to waste of alloying elements or inability to control steel-making well enough to use them."

The report also said Japanese lack of experience with technology and precision manufacture is shown in the manufacture of highly stressed parts of airplane engines.

Old Jewish Manuscripts Recovered From Germans

WITH UNITED STATES 3RD ARMY IN GERMANY. — A large collection of Jewish manuscripts, paintings and other cultural articles stolen by the Nazis in various parts of Europe was discovered by the 5th division recently at Hungen, 10 miles southeast of Giessen.

The collection, which includes some things dating from the 14th century; was the second treasure trove found by the United States 3rd army in three days. Gold bullion worth $100,000,000 and paintings and other things of value were found in a salt mine at Merkers.

The Jewish collection served as a basis for pseudo-scientific attacks by Dr. Alfred Rosenberg, notorious Nazi propagandist, on world Jewry. Most of the manuscripts and books were believed to have been taken from the Oppenheim museum at Frankfurt am Main, the Jewish Historical museum at Amsterdam and museums at Paris.

Lt. Robert Schoenfeld of Brooklyn led the detail which found the collection. Most of it was in an old castle.

Great Mansions at New York on 'For Rent' List

NEW YORK.—"For Rent" signs appeared, figuratively, on the J. P. Morgan and William Guggenheim suburban mansions shortly after the Charles M. Schwab town house and William K. Vanderbilt country home were registered similarly with the city's vacancy listing bureau.

Both the $1,500,000 Morgan house—46 bedrooms, 21 baths, 2 kitchens—and the relatively cottagelike Guggenheim mansion—20 rooms assessed at $380,000—were offered primarily for foreign government missions.

The 75-room $3,000,000 Schwab mansion on Riverside drive had been offered for a $75,000 annual rental. A spokesman for the Chase National bank, custodian of the Schwab show place, did little to entice tenants.

"There is not a piece of furniture in it," he said. "It takes about 10 tons of coal a day to heat it in the winter, and it could be made suitable for accommodating a number of families only at great expense."

What a Pal Was This! Now Johnny's in Pickle

GREEN BAY. — A Green Bay schoolboy had a pal and, he believed, a good trick until—

When the boy's report card wasn't much to bring home the pal would sign the name of the boy's mother. Recently the boy began to get extra assignments and asked his teacher why.

The teacher showed him the card. His ex-pal had written: "Please give my son more homework. Mrs. B."

Wealth Goes to Things He Never Cared About

BIRMINGHAM, ENGLAND. — Arthur W. Keep, wealthy exporter, who died last November, left the bulk of his fortune of more than $600,000 to the city of Birmingham for sports fields, swimming pools, and bus and trolley shelters. Associates said he never had shown any interest in sports, never learned to swim.

Showers for the bride originated in Holland.

Capt. Bill Cone Is Given Second Citation by Army

Special to News: Ninth Air Force Medium Bomber Group, France.—Captain Clarence E. Cone, 28, Canyon, Texas, is a member of the 17th Bombardment Group at Dijon, France, which recently was cited for the second time by the War Department as a Distinguished Unit.

Oldest medium bomber group in the AAF, the 17th was cited after action against the enemy in the European Theater of Operations on April 10 in aerial cooperation with the 7th U. S. Army advance through southern Germany.

Blanketing enemy strong points at Schweinfurt, attacking B-26 Marauders of the 17th Group made it possible for the 42nd U. S. Infantry division of the 7th Army to seize the city with virtually no opposition, the citation noted, "thus bringing to a more rapid conclusion the ultimate victory of the Allies."

Formerly a unit with the First Tactical Air Force in the ETO, the 17th now is part of the Ninth Air Force.

In continuous combat in the Mediterranean and European Theaters of operations from December 30, 1942 until V-E Day, the group previously had been cited for attacks on the Ciampino (Rome), Italy airdromes in January, 1944, prior to the Allied landings at Anzio. The group, as part of the 42nd Bomb Wing (US), has also been awarded the Croix de Guerre with palm by the French Provisional Government for air-ground co-operation with French troops in the Italian campaign.

A squadron adjutant with the group, he has been overseas 30 months. He has been awarded the American Defense Service Medal and is authorized to wear the Distinguished Unit Badge and Cluster. He is also authorized to wear the European Theater Ribbon with 6 stars.

Mrs. Kate D. Brewster, who is attending school in Lubbock this summer, spent last week end with her little daughter, Karen, and her parents, Mr. and Mrs. L. A. Donnell.

Mrs. Lucy Minturn will leave Friday for her home at Salem, Oregon, after having visited at the home of her sister, Miss Pauline Brigham.

Mr. and Mrs. Bob Stratton are here from their home in California to visit at the home of his brother. C. H. Stratton, and relatives at Happy.

Night Shift ON THE FOOD FRONT
FARMALL

THEY DID IT BEFORE— THEY CAN DO IT AGAIN

With Farmall Tractor Power

THROUGHOUT the Spring, from the Rockies to the Atlantic seaboard, worried farmers searched the skies for signs of clear weather, but the cold rains fell relentlessly.

For more than a month the seed should have been germinating in the warm soil. Millions of acres lay unplanted because the ground was too wet for preparation of the seed bed and too cold for germination of the seed.

Only a generation ago there could have been but one outcome—crop shortage and food scarcity. Nature allows scant time for planting when the warm sun waits till late May or June before drying the soggy soil. Horses are too slow and tire too quickly to get the job done then.

But the farmers remember May of 1943—only two years ago—when their fast, untiring tractors averted crop failure. Then, too, rains flooded the fields and the month was all but spent before they could go in on the land and plant.

In 1943, most farmers drove their tractors from dark to dark, and longer. Many planted around the clock, working in two or three shifts. They made one of the greatest crops in history.

In today's war-torn world—with hunger and disease already stalking many peoples—even one major crop failure could bring famine. This is why the sound of tractors and planting machinery was heard, day and night, from the Plains states to the Eastern seaboard—why headlights stabbed the darkness over the fields.

America's farmers are doing it again, in spite of an unprecedented combination of adverse circumstances—bad weather, shortages of machines and shortages of manpower. For the second time in three years, they are relying upon their tractor-powered machines to help rescue large areas of the world from catastrophe. More of these tractors are products of International Harvester than of any other company.

Anniversary of Social Security Is Observed

July 6th marks the 8th anniversary of the opening of the Amarillo, Texas Social Security Board office, located at Room 324 in the New Post Office Building. The office was established for the purpose of issuing social security account numbers and furnishing information and assistance in the filing of claims for old-age and survivors insurance benefits under provisions of the Social Security Act.

"Early in the program our biggest job was the issuing of account numbers," said James L. Farmer, manager of the Amarillo office. Although issuing these numbers still involves considerable time in this office owing to the fact that new workers are entering the labor market daily, our biggest job now is taking claims for benefits, and at the present rate, it will continue to take up a considerable part of our time. Another special service is to the returning soldier who has social security problems to solve, and to each we give careful personal attention," he continued.

As of June 30, 1945, monthly benefits are being paid to 1049 beneficiaries in the twenty-six counties served by the Amarillo field office, which is an increase of 305 beneficiaries in the past 12 months. The total benefits to the 1049 persons amount to $15,931.47 monthly. The three counties receiving the greatest benefits are Potter, Gray, and Hutchinson.

Old-age and survivors benefits are paid to retired workers in business and industry and to survivors of deceased workers. Consequently, payments are proportionately greater in urban areas, Mr. Farmer said. In its 1944 Annual Report, the Social Security Board has recommended the self-employed, farmers and other excluded groups be included in the Old-Age and Survivors Insurance Program.

The man at the top is usually someone who has been going to the bottom of things.

Pleasantview

Mr. and Mrs. Aaron Cummins and family with Bud Cummins called in the Jim Bible home Sunday.

Mrs. Erwin Meyer and children returned to their home at Randolph Field Thursday night after having spent six weeks in the home of her parents, Mr. and Mrs. J. W. Spencer and other relatives. Her husband, S-Sgt. Meyer has been attending school in Seattle, Wash.

Mr. and Mrs. Charlie Bible and daughter called in the Jim Bible home Wednesday night.

Mary and Jimilie Jennings spent the week end with June and Janie Jennings.

Jim Bible and Billy and Aaron Cummins called in the Herbert Barrett and Curtis Robertson homes Sunday morning.

Mrs. John Jennings and daughters visited Mrs. Lula Collins in Amarillo Sunday.

Mrs. Henry Meyer and Mrs. Albert Meyer and daughters called on Mrs. Erwin Meyer in the J. W. Spencer home Thursday evening.

Miss Janie Jennings visited Miss Helen Meyer Monday evening.

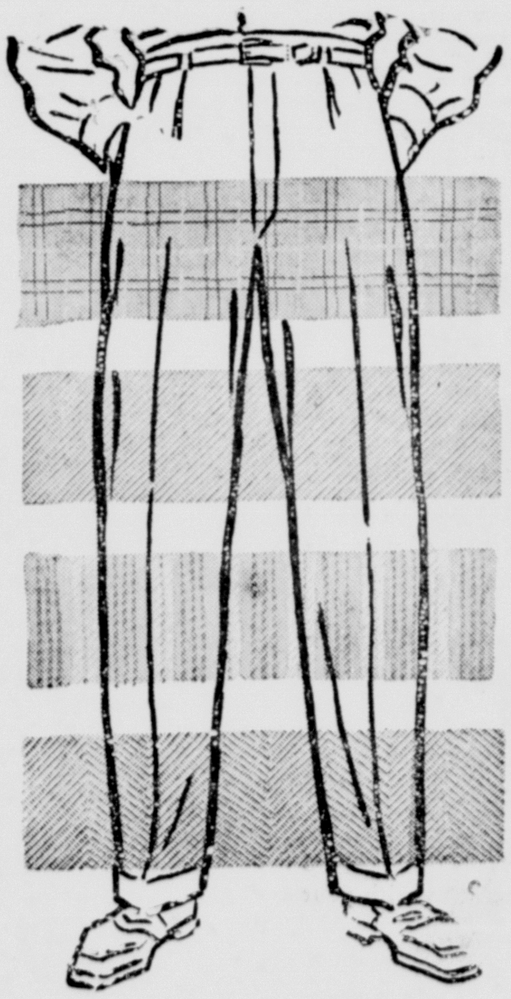
Mrs. Sarah Bunch of Fort Worth arrived Tuesday morning to spend a few days in the home of her brother, J. W. Spencer.

WT Foundation Gives Nod To Chapel Plan

The West Texas State College Foundation, speaking through its president, Ross D. Rogers of Amarillo, endorses the Campus Chapel project in these words:

"I can visualize no finer project, nor a more worthwhile addition to the campus of West Texas State College, than a beautiful chapel. As chairman of the Foundation, I heartily commend the campaign now under way to build it, and pledge full co-operation from myself and the foundation."

Today's style trend seems to be to swap the wedding dress for a divorce suit.



IT'S A SLACK SEASON!

Slacks in all fabrics!

Cottons, cotton-and-rayons, rayons—in those smooth gabardine weaves!—wools, wool mixtures—slacks in materials to cover any summer occasion!

Slacks in all colors!

Match them to a jacket, contrast them with a shirt, have bright colors or subdued, tweedy mixtures! We have 'em all!

Slacks in all sizes!

So you think you have a figure problem! We've made provision for you and stocked sizes for the short, the tall, the lean, even the very broad!

Slacks at all prices!

'Liquid Heat' Is New Home Plan

Heating Medium Designed To Supply Power for All Utilities in House.

CHICAGO. — A new heating medium called "liquid heat," designed to supply one central source of power for all home utilities such as house heating, cooking, refrigeration and lighting, is explained in Plumbing and Heating Business magazine.

"For many years industry thinkers have privately predicted that the home would eventually be equipped with one source of power," the article says.

New Power Source.

"Instead of an independent refrigerator, independent boiler, independent water heater, independent electric generator or power line, independent cooking range, etc., they visualized development of a power source somewhat similar to that in an automobile where a dozen separate functions are all powered from a single source, including the engine itself, cigar lighter, heater, battery, lights, horn, windshield wiper, and even air-conditioning.

"In theory at least that development has now arrived."

With the financial help of the federal government, through the National Housing administration's office of product research and development, the idea has been pushed to the point where a complete range of equipment and appliances is now either in model form or on paper.

Can Run Generators.

The process was developed and patented by Orion O. Oakes of the John B. Pierce foundation, Summit, N. J. Its basis is a chemical known as tetra-cresyl silicate which will absorb heat up to 817 degrees Fahrenheit when circulated in residential boilers of present types, at atmospheric pressure.

This contrasts with water, which becomes vapor at 212 degrees Fahrenheit, and shows the possibilities in the liquid as a medium for conveying heat. It is claimed that the heated fluid—a secret formula—can be used for heating water, for cooking, for percolators, toasters, flat irons and ironers, as well as literally every appliance utilizing heat, including steam and hot water boilers.

Even low pressure steam turbines can be operated from its heat and used to run electric generators in areas not now served with electricity. For hot air house heating systems, a heat exchanger has been designed, according to claims made by the inventor, whereby air is passed over finned coils containing the liquid to obtain heated air for rooms.

Lake's Lure Cures Vets Of Allergy for Boats

HOT SPRINGS, ARK.—There's a standing vow among soldiers who have suffered from seasickness and other hardships during their journeys aboard crowded troop transports that they will never take a boat ride again of their own volition.

But the natural beauties of Lake Catherine near here and the urge to see how things look from the middle of the lake have broken down the "boat-allergies" of numerous overseas veterans sent to the army redistribution center here.

In fact, boating has proved one of the most popular sports among returnees who visit the redistribution center's Lake Catherine lodge.

The army has two 60- and 130-horsepower speedboats at the lake as well as a number of other fishing craft.

Postal Service Aiding In Control of Cancer

WASHINGTON. — The United States post office is helping out in the current cancer control national campaign by offering to accept contributions in envelopes bearing the one word, "cancer." It's cancer control month, the Postmaster Frank C. Walker said the post office department was "proud of the part given to us in helping to make known to our fellow Americans the truth which will save hundreds of lives."

His 16 Children Bring Corporal Captain's Pay

OMAHA. — Leo Kinzer of Fort Omaha is on the army payroll as a corporal—but his pay equals that of a captain.

The corporal is the father of 16 children, ranging in ages from 20 months to 24 years.

Three are married and a fourth is over 18, leaving him with 13 direct dependents. The family lives at Columbus, Neb., and each month Mrs. Kinzer receives $300.

Find More Than Ton of Meat in Garbage Dump

POUGHKEEPSIE, N. Y. — After neighbors complained their dogs were bringing home dead chickens, more than a ton of assorted meat, some in good condition, was found on a city dump near here. Sheriff C. Fred Close said the meat, including crated and barreled beef, veal, pork, cold cuts, tongue, bacon and poultry, "may have been dumped because of OPA investigation of suspected black markets."

Nothing but an echo can get the last word with the wife.

Chapel Approved By Ministerial Alliance

President J. A. Hill was invited to attend the meeting of the Ministerial Alliance yesterday morning and to present the plans for the building of the Campus Chapel.

The pastors of Amarillo churches were greatly interested in the enterprise and asked many questions concerning the Chapel and its uses.

At an early date Dr. Hill will speak at the San Jacinto Methodist Church and San Jacinto Baptist Church at which places he has been asked to discuss the Chapel building program.

Amarillo Minister Praises Chapel

Of the chapel which will be built on the campus, Dr. Neal D. Cannon, pastor of the Polk Street Methodist Church, Amarillo, has written President J. A. Hill:

"I was delighted to hear of your desire to have a chapel built on the campus . . . , and to provide several endowments to care for the expenses of religious leaders who might come to your campus. . . . I wish to compliment you upon initiating this noble undertaking. Surely it is deserving of the support of the people . . . who would like to see the religious emphasis upon the campus of a state school. May you be greeted favorably wherever you go to raise funds. May the blessings of God be upon you, as you seek to bring to a reality this dream which you have had."

Dr. Cannon preached the baccalaureate sermon for the spring class of 1945.

Supt. J. B. Speer is home from Austin for a few days. He is attending the University of Texas this summer.

The largest motor in the world is 44 feet long, 16 feet wide, and 13 feet high. It has sufficient power to lift a four-stack destroyer weighing 1,350 tons, at the rate of 200 feet a minute.

Britain's Royal Air Force dropped an estimated 200 tons of paper (propaganda leaflets) monthly on Germany, the Low Countries and France, during World War II.

A rainfall of one inch over one acre of ground means a downpour of 27,143 gallons of water, or 603 barrels of 45 gallons each.

Although the United States has used standard time since 1883, no legislative action for the country as a whole was recorded until March 19, 1918.

Clocks were advanced one hour, from standard time to war time, on February 9, 1942, by Act of Congress.

On top of Mt. Washington (N.H.), on April 12, 1934, at 1:21 p. m., there was a wind gust at the rate of 231 miles an hour.

Due to the resistance of the air it takes about 19 seconds for a bomb to reach the earth when dropped from an airplane a mile high.

The windiest point in the United States is on top of Mt. Washington in New Hampshire.

Dr. Condron Presents Lecture Series on Adult Education

"I am writing to express my appreciation of the contribution you made to the Adult Institute. It was certainly a pleasure to all of us to have you here, and I felt that your leadership was both an inspiration and a challenge to the group."

This excerpt from a letter written to Dr. S. H. Condron is typical of the reactions encountered everywhere he spoke in a lecture series on the behalf of the Board of Education of the Methodist Church. The eight day tour, which began June 16, included Henrietta, Paris, Dallas, and Greenville.

The salient point of Dr. Condron's addresses was the idea of changing the old method of International Sunday School proceedure for one in which each group would select its own material, keeping in mind its immediate and perhaps local needs. This method would make possible the utilization of guidance in coping with immediate problems.

Dr. Condron spoke before assemblies of Sunday School teachers, superintendents, laymen, and to a few regular church congregations.

The work that Dr. Condron is doing to further adult education throughout the state is an example of the attitude of the teaching staff of W. T. toward assisting in religious activities. At sometimes ninety per cent of the faculty members have held positions of leadership in various churches.

Of his work Dr. Condron states "If the church is to make a contribution to world readjustment, it must look to adult education."

Lt. and Mrs. Arthur C. Haley and daughter left this morning for Jacksonville, Fla., where Lt. Haley will report to the navy following a transferr off the ship to which he has been assigned.

NO. 559
THE STATE OF TEXAS
COUNTY OF RANDALL
TO THOSE INDEBTED TO OR HOLDING CLAIMS AGAINST THE ESTATE OF NETTIE M. JENNINGS, DECEASED:

The undersigned, having been duly appointed executors of the Estate of Nettie M. Jennings, Deceased, late of Randall County, Texas, in the will of the said Nettie M. Jennings, Deceased, hereby notifies all persons indebted to said estate to come forward and make settlement and those having claims against said estate to present them to them within the time prescribed by law at their residences in Canyon, Randall County, Texas, where he, and each of them receives his mail, this the 11th day of June, A. D. 1945.

DO YOUR BEST THIS LAST WEEK OF DRIVE

It'll take all the fight he's got—

STAY WITH HIM!

So you think that licking the Japs will be a push-over? . . .

The Jap is glad to hear it. In 3 years of war with us he's lost less territory than he seized in the first 3 months of war. And he'd like to hang on to it.

So you're thinking of quitting your war job soon? . . .

70 million Japs hope you do. Nearly 35 million of them are working 12-16 hours a day, 7 days a week, to beat you. They can't quit. They don't want to quit. They plan to win. And, in addition, some 400 million enslaved peoples are forced to work for them. And they can't quit either.

Think over these cold facts:

- The Jap has never lost a war—yet.
- The Jap now controls the second largest empire in the world, all of it in his own Pacific backyard.
- The Jap says he's willing to spend 50 years, 10 million Jap lives, to hold on to what he's got. *And the Jap means just that!*
- The Jap doesn't quit. In the war against us he has lost hundreds of thousands dead, only a few thousand prisoners.
- As the Jap is pushed back—slowly, bitterly, taking as yet uncountable American lives with him—his supply lines shorten, like the coiling of a fist. Our lines lengthen—*and he gets relatively stronger.*

How you can help

1. Keep that war job!
2. Keep buying Bonds!
3. Keep doing all your country asks!

Remember—the Jap holds aces. His warfare is defensive, entrenched. His fighters are determined to kill as many of our men as possible before dying "gloriously" for their emperor. Despite eight years of war, *the Jap army has not yet been mustered to its full strength.*

To crush the Jap, our Army, our Navy, our Coast Guard and Marines—every branch of the service, must fight him with men, ships, planes and supplies over an area of thousands of miles.

How long will it take to win?

That's squarely up to you . . .

. . . and whether you give your best to your war job. And keep buying Bonds. And keep replacing the blood of fallen Americans with your own.

Studies Mystery Of Common Cold

Streptococci, Not Virus, Is Cause, Says Army Medic.

PORTLAND, ORE. — A solution of the mystery of the common cold, by evidence indicating that most colds are not caused by a virus, as the medical profession has taught, but by streptococci, is offered by Capt. Edward E. Brown, port surgeon, United States army medical corps, Portland, Ore.

His report, published in Northwest Medicine, cites evidence from 13 years' study of colds, mostly in children with rheumatic fever, at the Post-graduate hospital of Columbia university, New York City.

Captain Brown predicts that strep colds can be prevented or helped by sulfa drugs. He suggests also that cold vaccines made for streptococci will be effective against colds, where virus vaccines are known not to be effective. The confusion about cold vaccines has been one of the mysteries of common cold treatment.

Captain Brown's experience shows that well over 90 per cent of common colds are caused by streptococci.

The army officer says further that the streptococcus type of infection is a reasonable explanation of the common experience of laymen, which doctors verify, that colds greatly increase with chilling weather. He reports observations showing the improbability that chilling can start a virus cold. He cites well known germ reactions in the nose to prove that strep colds can be initiated by chilling.

Captain Brown does not mention the last year's reports of army and navy officers who said repeatedly that daily doses of sulfadiazine prevented 70 to 90 per cent of upper respiratory infections in more than half a million men.

The common cold is an upper respiratory infection. The military reports, however, omitted listing colds among the 70 to 90 per cent preventions.

Clue to Extinction of Dinosaur Is Discovered

LOS ANGELES.—A clue which may unravel the mystery of the extinction of the great race of prehistoric dinosaurs has been discovered by Dr. Raymond B. Cowles, associate professor of zoology on the Los Angeles campus of the University of California.

In experiments with night lizards, Dr. Cowles found that these reptiles become sterile at temperatures not high enough to cause general damage to the animal.

Since reptiles as well as other animals have a tendency to seek higher temperatures to speed up their body processes, Cowles believes the dinosaurs and possibly other land animals may have impaired their powers of reproduction by too much exposure to heat.

A falling birth rate produced in this way among the prehistoric monsters could have led to their gradual extinction. If accompanied by climatic changes causing greater warmth, the extinction may have been sudden, perhaps taking only a few million years, Cowles declares.

France Is Delivering Newly Made Motor Tires

WASHINGTON. — Several French factories began recently to deliver new tires in substantial quantities to both the army and civilians as a result of Allied arrangements to bring French industry into the joint war effort, it was learned.

Informed sources said the tire program was one of two go-aheads France had received on critical war production. The contract called for both tire and cotton textile production, principally tent duck — two items on which production in the United States is behind schedule.

Fleet of Planes Drops Supplies to Hollanders

LONDON.—A fleet of RAF Lancasters, bomb bays loaded with food, dropped more than 600 tons of supplies in occupied Holland to feed thousands of starving civilians. The parcels, dropped without parachutes, contained meat, flour, yeast, cheese, margarine, sugar, dried peas, powdered milk and eggs, concentrated vegetables, chocolate, tea and salt and pepper.

Jap Boys to Study Fish In Bomb Crater Ponds

SAN FRANCISCO. — Japanese children of Nagoya are going to get "object lessons in natural history" from bomb craters made in the industrial city by B-29s. Domei, Japanese news agency, reported in a broadcast the craters were being made into fish ponds so children would have opportunity to study marine life.

Mrs. Roosevelt Picks Cottage for Her Home

NEW YORK. — Mrs. Franklin D. Roosevelt will never live again in the "big house" of the Hyde Park estate. Her secretary, Malvina Thompson, said the former first lady would remain in a cottage. There she will be assured of privacy when persons come to pay homage at her husband's grave.

Many a girl is now on the last lap in the matrimonial race.

Worley Writes of Travels By Airplane

It is difficult to realize how much this world has shrunk. In one day I flew from Casablanca which is in Morocco, North Africa to Washington, D. C. We came by the Azores and Newfoundland, New York, and on down to Washington, which is better than three thousand statute miles. We hit good weather and bad weather. Some time we could see the wing tips but often they were obscured by the clouds. And you've no idea how much you'd like to reach out and pat those engines as you fly along at 200 miles an hour and see an awful lot of blue water below you. Compare a one day flight from North Africa to America with the months required by Christopher Columbus when he ventured across the Atlantic.

The day before the war ended we were in Germany during the morning, in France early afternoon, London that afternoon, and could have been in New York or even San Francisco the next day. These illustrations give you some idea why we necessarily must adjust thoughts and perspective in terms of increased speed in transportation and communications. It is difficult to see the damage done by a Nazi V-2 bomb and still pay no attention to what goes on elsewhere in the world. It is difficult to see the terrific destruction heavy bombings can cause and still feel that the two oceans offer the United States the same protection against the enemy which they have provided in the past.

It might be of interest to point out some of the characteristics of the V-2 bomb, which was giving London plenty of trouble. The German V-2 bomb is a 13½ (long) ton wingless projectile that travels at a maximum speed of 3600 miles per hour, which is faster than sound travels. Consequently the V-2 had already hit and exploded before the sound was heard. Approximately 9½ (long) tons of liquid fuel are used to obtain the thrust for flight. The fuels are liquid oxygen and alcohol in about a 50-50 ratio. The bomb is 46 feet long and 5½ feet in diamater, is launched from a vertical position, and when it reaches the desired velocity and height for a particular range, the fuel is cut off by radio or by an internal preset control. Military experts told me that had Hitler been two months ahead of his V-2 production program London could have been wiped off the map.

And another revolutionary invention which could well be a potential weapon is the jet plane. Engineers and scientists say there is virtually no limit to the speed at which the jet plane can travel. About the only limitations are those upon the physical endurance of the pilot and how much stress and strain the plane itself can stand. They say, for example, the future jet plane can travel 800 miles an hour. As pointed out above, the V-2 travelled at 3600 miles an hour and please bear in mind that the Nazi scientists and engineers were just beginning to develop this type of bomb.

I was in the following countries: Germany, France, England, with a low level flight over Belgium on our way to the coast. Then Italy and Greece, Egypt, and Palestine, the Holy Land. And back into North Africa. It sounds very strange to hear an Army flier in Egypt, for example, say he was in India yesterday and that everything was fine; or that he was in Washington day before yesterday and the weather was hot.

It is indeed a small world—and as I heard one of our G. I.'s in Europe say, "Maybe that's what's wrong with it.

Miss Richardson Gives Policy To Fund

Miss M. Moss Richardson, now retired from the English department of the college made one of the first contributions to the West Texas State Chapel Fund.

For years she had carried life insurance to be given to some worthy cause sponsored by the college. This policy is now a part of the assets of the Chapel Fund.

Miss Richardson has been identified with the religious life of college and town since 1918, and she says nothing has ever made her happier than having a part in the building of a place of worship for and on the campus.

FARMERS TO BENEFIT from new telephone developments

The telephone company is preparing a wide-range program to extend and improve farm telephone service. The goal is to bring telephone service to the greatest possible number of farm families.

Before the war, new devices and methods to serve rural areas were being tested and developed. Among them are stronger wire that takes fewer poles, a new type of wire to bury underground, a way to send telephone conversations over electric power lines, and possibly a radiotelephone system to reach outlying regions.

Just as soon as the war permits, we'll be hard at work on the farm job. It's not a new job—nearly 400,000 farm families have had telephones put in since 1940. But there's room for many more, and room for improvement. We're exploring every means of making farm telephone service better and easier to get.

A GOOD TAX PAYING CITIZEN WHEREVER WE SERVE!

There is only one place from which money can come to support our government, schools and the government services. It must come in the form of *taxes.*

Our taxes, along with yours, are helping to win the war, too. Taxes are as necessary as the things they buy—and we are glad to contribute our share as an American citizen who enjoys the securities and privileges of this great country.

Condron President of Canyon Rotary Club for '45-'46

DR. S. H. CONDRON

Dr. Stuart H. Condron presided Tuesday at the Rotary Club luncheon for the first session of the new Rotary year. He announced committees for the coming year, and outlined the policies and program for his administration.

The problem of International Relations was conceded to be the greatest problem confronting the world. "This problem does not begin in Washington or London or Moscow, but right here in Canyon," stated Mr. Condron. He urged active interest of all citizens in the movement for peace.

In all of the elections held in Europe, the Communists have won. "Does this mean anything to us?" asked the speaker.

Mr. Condron advised citizens to read the article, "My Town," in the current issue of the Saturday Evening Post. He then praised the spirit which he found in Canyon, the team-work and spirit of cooperation. The human problem after the war will be the greatest problem of the community, and local leadership is needed to solve this problem.

"1945-46 are as significant to the future of the nation as 1776," stated the speaker.

Past District Governor Harris M. Cook outlined the planning program of the new district governor which will be held in Amarillo on July 12. All Rotarians are asked to attend this conference.

Visitors were: Lt. Arthur C. Haley, Jr., Chester Strickland, Dutch Cleavenger, T. A. Black, Tommie Cole, all of Canyon; John H. Patton of Hereford; Winston Savage of Pampa; T. L. Andrews, Earl Shelton, Arch Hunsley, W. S. Norman, C. M. McMurtry, Frank Barnes, all of Amarillo.

Wayside Items

Mrs. Menefee's sister, Miss Marlea Ruth Campbell, has been visiting them.

Mr. and Mrs. Marvin McGehee, received a wire from the Government saying their youngest son, Lyman York, had been missing over Japenese territory since May 26. Our community is very sad over this news and hopes and prays better news will soon follow. Our sympathy goes out to his family.

Miss Lorene Payne is visiting with her mother at present but expects to begin training as a nurse this fall.

Rev. and Mrs. Stuart were to leave Sunday for El Paso to visit a daughter and family.

Mr. and Mrs. W. R. Franklin visited Sunday with his sister, Mrs. Leavy Jaeger of California, who arrived at the home of her mother, Mrs. E. A. Franklin, in Happy last Thursday.

Miss Evelyn Sluder of near Happy spent Sunday night in the W. R. Franklin home.

Word has been received that Willie Modisette, who was a prisoner of Germany, has arrived at the home of his parents in Oklahoma.

Texas stands among the first ten states in America in wood production.
